Press Release

Jetstream and HiTech Global Sign Distributorship Agreement

Naperville (IL) USA, June 20, 2007 – Security silicon intellectual property (IP) provider Jetstream Media Technologies announced today the appointment of HiTech Global of Silicon Valley (CA) as its IP distributor.

Under the agreement, HiTech Global will distribute Jetstream Media Technologies' entire family of security IP cores, including AES, AES/CCM, AES/GCM, XTS-AES, 3DES, Configurable Secure Hashing cores supporting MD5, SHA-1, SHA-224, SHA-256, SHA-384, and SHA-512, a PKC accelerator for RSA™, and additional multi-function cores. Jetstream's AES, 3DES, Hash, and CCM products have recently passed the NIST Cryptographic Algorithm Validation Program (CAVP), and are now FIPS 140-2 ready.

"We are delighted to partner with HiTech Global" said Philip Chao, president and CEO of Jetstream Media Technologies. "Its expertise in both IP engineering and trade will be key to assist our customers with any design challenge they may have, and will improve Jetstream's quality products' presence in the embedded market."

"Partnership with Jetstream Media Technologies enables us to respond to rapidly growing customers' demands for providing high-quality and complex security IP cores". Said Cyrus Merati, Sr. Director of Business Development of HiTech Global Distribution. "Combined expertise of both companies, provides a reliable and unique source for security IP cores used in ASIC, SOC, and FPGA designs".

About Jetstream Media Technologies Corporation: Jetstream Media Technologies is a rapidly growing company in the field of semiconductor intellectual property (IP) cores for the protection of communications, storage and digital contents. Jetstream's security IP core family includes AES, 3DES, CCM, GCM, XTS, Hashing cores, PKC accelerator for RSA™, and multi-standard cores. For more information visit www.jetsmt.com or www.security-cores.com.

About HiTech Global Distribution LLC: HiTech Global Distribution LLC (HTGD) is a North American based company headquartered in Silicon Valley, California. HTGD's main line of products includes IP Cores, Evaluation/Prototyping/Demonstration Boards, Application Specific Modules (DSP, Processing, Video, etc.), Application Specific Systems, Embedded System Design Tools (HW/SW Debuggers, Emulators, Operating Systems, Verification, etc.), Software/Drivers, and Accessories. HiTech Global Distribution, LLC also provides FPGA, ASIC, SOC, and PCB design services. For more information about HiTech Global Distribution, LLC, please visit: <http://www.HiTechGlobal.com>
